Do you have a document that summarizes the answers to the IW Household Questionnaire? I am interested in the responses to questions 2 to 10. I do not want any information with actual personal identifiers (name and contact persons in question 1).

Eric Borton ---06/29/2009 12:53:36 PM---Hi Bob,

Subject: Vermiculite Health Information - University of Cincinnati

Hi Bob,

In our first meeting at UC, you expressed interest in our health data from the 2004 vermiculite study and household information like showering, laundry etc...

Attached are 2 questionnaires asked during the 2004 visit to Marysville and a follow-up household contact study. Through these questionnaires, it may be easier to identify the medical / household questions of interest versus providing just a list of variables without context.

Once you have identified the questions of interest then just let me know and I will be able to retrieve the data for you.

-Eric
